Mobile health services offered at 14 sites in the county in August

SARASOTA COUNTY — The Florida Department of Health in Sarasota County's (DOH-Sarasota) Health In Motion Mobile Medical Unit staff will provide free and low-cost health services at 14 sites around the county during August.

The services offered through the mobile unit include diabetes education and screening, blood pressure tests, pregnancy testing, HIV testing, body mass index (BMI) measurement, health education and adult immunizations.

The human papillomavirus (HPV) vaccine that offers safe and effective protection against certain cancers is offered at no cost to those who are 19-26 and have no insurance.

One dose of the Tetanus, diphtheria and pertussis (Tdap)

vaccine is recommended to replace the regular tetanus vaccine for adults, and pregnant women (for each pregnancy). It is especially important in preventing pertussis or whooping cough in adults who care for infants who are too young to be vaccinated. This vaccine is available to individuals 19-26 years of age who have no insurance or who are under insured. Tdap is also available at no-cost with no age limit for the homeless. Hepatitis B vaccine is also available at no cost to those who qualify through the special '09' Hepatitis Prevention Program.

The staff also assists individuals who lack medical insurance and do not have a health care provider to find a medical home for ongoing health care.

No appointment is needed. Some services are free, including HIV rapid testing with results in 20 minutes and tobacco cessation referrals to any of the three no-cost options offered by Tobacco Free Florida's 3 Ways to Quit. Other services are provided on a sliding-fee scale based on income. A registered nurse is available at all sites.

While these services are most often provided in a 40-foot-long bus, there are times when services are provided inside the facilities visited.
